Wei Te Chung

DECLARATION OF HSIEN KUN LEE

1. I, Hsien Kun Lee, is the first inventor of the aforementioned application.
2. I and other two co-inventors had the concepts of the instant invention around the mid of May, 2002. In August, 2002, we requested our internal IP division to prepare patent application for us in Taiwan. A softcopy of the related drawing was provided to our IP division, of which a printout is enclosed herewith for reference (attachment 1).
3. Our IP division contacted me for preparing the specification and the drawings of the Taiwan application around late October or early November, 2002. I had communicated with our IP division several times regarding how to present and protect our invention, before our IP division finalized and filed our Taiwan application on 12/27/2002.
4. I did ask our IP division to file our patent application in Taiwan as soon as possible while our IP division was so busy and it was normal for them to

Appl. No. 10/620,636

spend around more than one or two months for finalizing their job. *It is noted that our IP division filed around 1000 Taiwan applications each year for the past few years in Taiwan.* Anyhow, in our experience this lead time was reasonable and also similar to that the outside law firm required, if I appointed the outside law firm for handling the patent application in Taiwan.

5. During this period, we also started making the sample for testing. A mock-up sample remains in our place till now, and a photo showing such a mock-up sample is attached herewith for reference (attachment 2).
6. According to the aforementioned statement, it is proved that the instant invention was made prior to the Hsien reference, with either constructive or actual reduction to practice.
7. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001 and that such willful false statements may jeopardize the validity of the application of any patent issued thereon.

By Lee, Hsien Kun Date: 2005-10-31
